Election/Restrictions

1. Applicant's election with traverse of the restriction requirement in the reply filed on 12 July 2004 is acknowledged. The traversal is on the ground(s) that structure of the invention is the same whether applied to the window of a tow vehicle, pick-up tailgate on a tow vehicle or the back of a tow vehicle. This is found persuasive and the restriction requirement is withdrawn.

Amendment

2. It is noted that the amendment filed 3 May 2004 uses the status identifier "newly amended" in front of claim 16. This is not a proper status identifier and in future applicant must use one of the seven proper identifiers: original, currently amended, canceled, withdrawn, previously presented, new, and not entered.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claim 16 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,619,685 in view of Wilcox et al. or Byers.

Claim 16 is identical to claim 1 of the '685 patent except it recites a plurality of suction cups instead of a suction cup.

It is known in the art, for example as shown by Wilcox et al. and Byers, to use a plurality of suction cups to attach a mirror to a vehicle window a plurality of suction cups in order to increase the adhesion force between the mirror and the vehicle window.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the invention of claim 1 of the '685 patent by using a plurality of suction cups in order to increase the adhesion force between the mirror and the vehicle window.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claim 16 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 16 line 24 the phrase "wherein the support object is a group of support objects comprising..." does not make sense. It appears this should read --wherein the support object is selected from a group of support objects comprising...--

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references disclose mirror assemblies.
